CompSci LLC, Full Stack Developer, March 2025 – Present

Full Stack Developer at CompSci, responsible for end-to-end development, participating in the full Scrum lifecycle including requirements analysis, sprint planning, development, testing, and deployment. Built and maintained scalable frontend and backend solutions, ensuring performance, reliability, and seamless user experience.

Technological Stack: React, Kotlin, Java, MongoDB, AWS Services, Jira, Gitlab.

Vensure Employment Solutions, Senior Full Stack Developer, January 2024 – March 2025

Full Stack Developer at Vensure Employment Solutions, responsible for developing and implementing integration solutions for HR systems, participating in the full Scrum lifecycle from requirements gathering to deployment. Built and maintained scalable frontend and backend components, ensuring reliable data exchange across platforms.

Technological Stack: .NET core, Angular, SQL Server, Azure Cloud.

AltiaTek, Senior Technical Consultant, January 2023 – January 2024

Data Analyst & Technical Consultant at AltiaTek, specializing in ServiceNow. Led a team of 8 engineers, overseeing delivery of Agile projects for internal and client engagements while driving technical excellence and team development.

- Owned team delivery across multiple projects, ensuring alignment with Scrum practices and timelines
- Coached and mentored team members, establishing structured learning paths and improving overall team capability
- Assigned responsibilities and managed workload distribution to maximize efficiency and output quality
- Provided technical consulting and data analysis solutions leveraging ServiceNow
- Acted as a bridge between business stakeholders and technical teams

Certifications: CSA, ITSM, CSM.

Stepstone, Senior Full-Stack Software Developer, September 2021 – January 2023

Full Stack Developer, responsible for developing and implementing multiple job board platforms across international markets. Delivered end-to-end solutions within a Scrum environment, from requirements gathering to deployment, building scalable frontend and backend systems to support high-traffic recruitment platforms.

- Designed and developed web-based applications for platforms including Jobsie, JobsLu, Caribbean Jobs, and Total Jobs
- Built and maintained full-stack features, including job listings, user management, and application workflows
- Collaborated in the full Scrum lifecycle: requirements analysis, sprint planning, development, testing, and deployment
- Ensured performance, scalability, and reliability across multi-region platforms

Technological Stack: .NET Framework, .NET core, Nestjs, React, PostgreSQL, SQL, Jenkins, Git, Bitbucket, Bamboo, SonarQube, Microservice Architecture, Serverless Computing, Docker, Lambda, API Gateway, EC2, DynamoDB, RDS.

Azucarera La Grecia, Senior Full-Stack Software Developer, June 2019 – November 2021

Full Stack Developer / Systems Integrations Engineer, responsible for designing and implementing end-to-end integrations to automate data exchange between enterprise systems, achieving an 80% improvement in process efficiency across departments. Participated in the full Scrum lifecycle, from requirements gathering to deployment, delivering scalable backend and frontend solutions.

- Designed and built integration pipelines to synchronize data across ERP and enterprise platforms
- Administered and optimized Oracle Database, PIMS ERP, and Infor Syteline environments
